

In the Title

Please replace the title of the invention with the following:

"MUSIC INFORMATION SYSTEM FOR OBTAINING INFORMATION ON A SECOND MUSIC PROGRAM WHILE A FIRST MUSIC PROGRAM IS PLAYED"

In the Claims

Please amend claim 92 as follows:

A1
SUB
B1

92. (Amended) A method in a television and music distribution system in which music is distributed over a plurality of music channels to a number of users for playing by their user music equipment, wherein each music channel has an associated data stream containing information on a plurality of music programs, the method comprising the steps of:

obtaining a first music program carried on a first of the plurality of music channels and obtaining the music information on a second music program from the data stream associated with the first music channel while the first music program is being played by the user music equipment;
